

CASE STUDY

Greenhouse Gas Services, LLC Sets the Standard with ClimateCHECK

In April 2007, Greenhouse Gas Services, LLC, a GE AES venture, engaged ClimateCHECK to advise on the development of a standard of practice, GHG quantification methodologies, and a verification system. A venture formed by GE Energy Financial Services and the AES Corporation, Greenhouse Gas Services has significant carbon market experience, project origination and development capabilities, and financing credentials.

ClimateCHECK Helps Greenhouse Gas Services, LLC Generate Credible and Cost-Effective GHG Credits

ClimateCHECK helped Greenhouse Gas Services, LLC develop the standard of practice for producing, managing, and marketing GHG credits. ClimateCHECK also worked with Greenhouse Gas Services to:

- Develop the format used to draft GHG quantification methodologies and spreadsheets.
- Validate GHG quantification methodologies for Landfill Gas, Coal Mine Methane, Waste Water Treatment Plants, Forestry, Energy Efficiency, and Agricultural Animal Waste Management Treatment Plants consistent with ISO 14064-3.
- Develop a verification system based on ISO 14064-3 and ISO 14065 to enable efficient, credible, and cost-effective verifications. This ensured each verified credit met the highest environmental and scientific standards. Tools developed include verification templates, project-specific risk assessments, and verification guidance and requirements.
- Advise development of the certification process to ensure each GHG credit complied with program requirements.

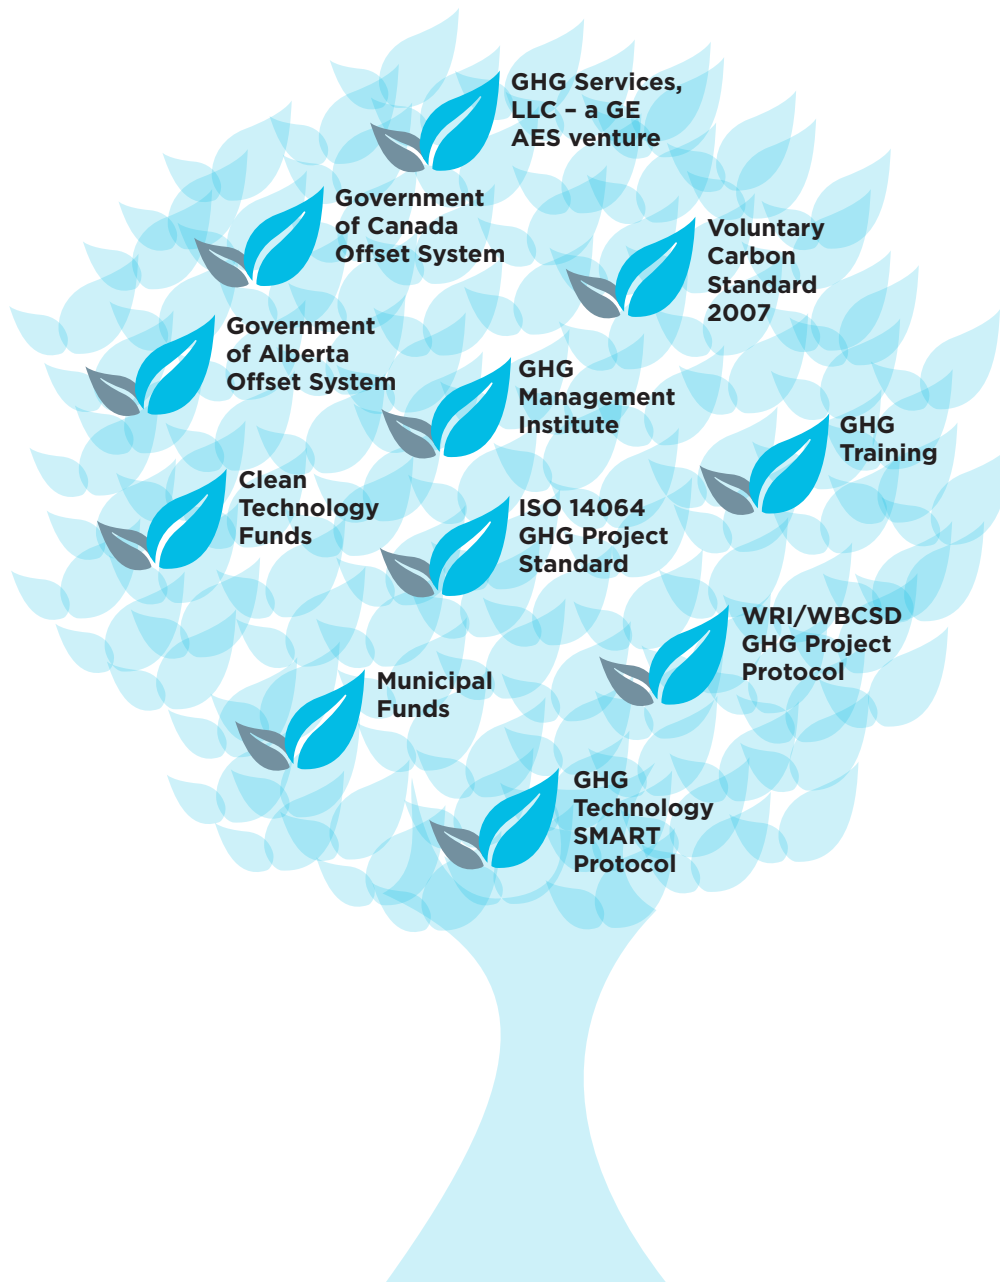

Project Details

- Completed:** April 2007-present
- Service Type:** Developed standard of practice for the production, management, and marketing of GHG credits.
- Protocol Used:** ISO 14064
ISO 14065

“ClimateCHECK continues to be an irreplaceable advisor for Greenhouse Gas Services, LLC’s entry into the voluntary GHG credit markets. From strategy to process to the details of highly technical protocol development and validation, ClimateCHECK brings world-class experience in best practice standards. As an expert in all facets of carbon markets, ClimateCHECK is helping us set the standard in international best practices.”

Karl R. Rábago
Director, Standards and Practices
